

## ArcOnline Parcel Viewer Instructions

When you click the “select” tool, make sure to click the “Select by Lasso” button (you can play with the other select tools as well, but the lasso tool is usually the easiest) (see photo below):

Then, make sure you have “checked” the “Parcels – Lee” layer (see photo below):

Then, to select the parcels you are interested in, click and hold your mouse, and drag your mouse pointer until you have selected all of the parcels you are trying to select.
