The New Community Power Committee

Mission: To explore the benefits of community power

WHAT IS COMMUNITY POWER?

Under Community Power programs, local governments can procure and provide electricity to their residents and businesses on a competitive basis. By bypassing outdated regulations, Community Power programs can harness private-sector innovation to lower costs for customers and provide other energy services. Electric distribution utilities (e.g., Eversource, Liberty Utilities, NH Electric Cooperative and Unitil) will continue to deliver electricity to customers via their transmission distribution systems.

WHAT ARE THE BENEFITS?

By aggregating purchasing power across a community, and by having greater flexibility in energy contracting than regulated utilities, Community Power programs can harness private sector innovation to lower costs for their customers. Community Power programs may choose to purchase power based on other attributes such as renewable sources. Community Power programs can also be a vehicle to construct local renewable energy projects to be the source of power for the program.

Senate Bill 286, signed into law on August 2, 2019, enables local governments to develop Community Power programs. Rules for the program have been finalized in recent months. Municipal and county governments may implement Community Power programs. Multiple local governments may join together to implement a Community Power program.
