

Lee Energy Committee Minutes
August 27, 2021

Members present: Louis Grondin, Barbara Wauchope, BOS rep. Carey Brown

The minutes of the Feb 4, 2020 meeting were approved

The first topic of discussion was electric vehicles. Carey Brown proposed that the town build a charging station on town property or, encourage The Market Basket to put some charging stations in near the store. It was agreed that this would be a good project for the near future.

Lou gave an update on the status of a proposal for upgrading the insulation in the Safety Complex.

The remaining discussions centered around the LEC's upcoming event the " Solar and EV Meet and Greet " on Sept 25, 2021 from 10 a.m. to 12 p.m. at Little River Park,

The event is for owners of solar arrays and electric vehicles and for people who are interested in learning more about these technologies. Several tables will need to be staffed with owners of solar arrays and electric vehicles who can answer questions.

Revision energy has expressed interest in co-sponsoring the event and staffing an information table. The advantage of having ReVision be a co- sponsor is that they can provide a good portion of the advertising needed. A proposal will be made at the next BOS meeting that seeks approval for ReVision Energy to co-sponsor this event.

Lou will contact to NH saves to ask if they could provide materials that can be distributed at the event. A flyer will be made and distributed at the Lee town fair.
